

- 1 Define kinetic energy
- 2 Is there energy in a stationary object?
- 3 What happens to the kinetic energy stored in an object when it's speed increases
- 4 What happens to the kinetic energy stored in an object when it's speed decreases
- 5 Define gravitational potential energy (GPE)
- 6 When an object is at ground level is there energy in it's GPE store?
- 7 What happens to the GPE stored in an object when it's height increases above ground level?
- 8 What happens to the GPE stored in an object when it's height above the ground decreases?
